

Akfen Renewable Energy Achieves the Highest Score in the SME Category in CDP 2024 Climate Change Reporting

Akfen Renewable Energy has taken another significant step in integrating environmental responsibility into its business processes, achieving remarkable success in the 2024 climate change and water security assessment conducted by the Carbon Disclosure Project (CDP), one of the world's most prestigious environmental reporting platforms.

As a result, Akfen Renewable Energy received a B score, the highest rating in the SME category for Climate Change. This achievement underscores the company's strong environmental management approach and its commitment to sustainability.

Mustafa Kemal Güngör, General Manager of Akfen Renewable Energy, commented on the achievement:

"This score once again proves our company's strong stance on environmental responsibility and our commitment to contributing to global sustainability goals."

The Carbon Disclosure Project (CDP), one of the world's most prestigious environmental reporting platforms, has announced its 2024 climate change and water security rating results.

As part of this evaluation, Akfen Renewable Energy achieved a B score, the highest rating in the SME category for Climate Change. This recognition further solidifies Akfen Renewable Energy's sustainability-driven approach and leadership in the renewable energy sector.

A Leading Global Environmental Reporting Platform (CDP) is the world's largest data platform, assessing corporate performance in critical environmental areas such as climate change, water security, and deforestation, while promoting transparency in reporting. By securing a B score, the highest rating in the SME category for Climate Change, Akfen Renewable Energy has reaffirmed its strong commitment to environmental responsibility within the renewable energy sector.

AKFEN RENEWABLE ENERGY GENERAL MANAGER MUSTAFA KEMAL GÜNGÖR: "CONTRIBUTING TO GLOBAL SUSTAINABILITY GOALS"

Mustafa Kemal Güngör, General Manager of Akfen Renewable Energy, shared his thoughts on this achievement:

"At Akfen Renewable Energy, we have made significant progress in environmental management and renewable energy production, driven by our commitment to generating energy from sustainable sources. This score once again demonstrates our strong stance on environmental responsibility and our commitment to contributing to global sustainability goals."

Climate change and natural resource conservation are not just environmental issues but also global challenges that directly impact the economy and society. To help address these challenges, we continue to invest in renewable energy production, prioritizing technology and innovation to shape the future of energy.*

As **Akfen Renewable Energy** continues to integrate **environmental responsibility into its business processes**, the company not only contributes to environmental protection but also takes significant steps toward **sustainable development goals**. By increasing the share of **renewable energy sources in the system**, **Akfen Renewable Energy** aims to **align with global sustainability trends and drive the transition to a greener future**.
